

Genre Listening Project

Genre is a word used to describe different types of art – whether music, visual art or literature. You are already familiar with different genres although you might not realize it. An example is popular music. The different genres you might know are rap, country, pop, k-pop, and hard rock. We have different genres of classical music including classical, romantic, baroque and 20th century. If you are still reading this, draw a smiley face on the top of the page for 10 extra credit points. For this assignment you are going to learn about different genres of music that string players can play. It is not a complete list but hopefully you will find a genre you like and may keep playing your whole life.

Listen to the YouTube videos and write comments for each genre.

How to pronounce *genre* <https://www.youtube.com/watch?v=hc6AfOeNV30>

ROCK
